I'm not robot!

This updated and reviewed edition of the American Book Award winner and the national bestseller revitalizes the truth of the story of the rich, explores how myths continue to be perpetrated, and includes a new chapter over 11/9 and the Iraq war. The Americans lost contact with their history, and in Lies My Teacher told me that Professor James Loewen shows why. After researching eighteen main texts of the history of the rich teaching of motion, he concluded that no one does a decent job of making the story interesting or memorable. Marred by an embarrassing combination of blind patriotism, foolish optimism, pure misinformation, and absolute lies, these books omit almost all ambiguity, passion, conflict and drama of our past. In this revised edition, full of updated material, Loewen explores how history myths continue to be perpetuated in today's mood and adds a chapter about the lies surrounding 11/9 and the Iraq war. From the truth about the history of Colombo's history for a honest evaluation of our national dials, Loewen revives our history, restoring the vitality and relevance she really has. Thought provoking, in no partisan, and often shocking, Loewen continues the true love in this clutic sick-loved by teaching teachers, history and citizens enlightened throughout the paás.
